

# TVA Loss Control Services

## Protecting Your Assets, Your Market Share, and Your Business

TVA has a broad range of loss control services that meet the needs of insurance companies, brokers, and loss control managers from all industries. At the heart of our loss control offerings is a comprehensive risk management program - a one-stop shop for all your risk management needs. From project development, to on-site inspection, to recommendation management, we offer all the services you need to reduce loss and allocate your funds wisely. Our risk management program also includes benchmarking, data analysis, and corporate and facility-specific identification of potential issues.

### TVA has several service offerings in property and life conservation:

- HPR and Middle Market Surveys
- Loss Control Consulting
- Account Management
- Project Management
- Training
- Impairment Monitoring
- Plan Review

### TVA also offers these loss control services:

- Subrogation Analysis
- Expert Witness Program
- Fire Scene Investigation (cause and origin)
- Disaster Planning
- Disaster Recovery
- Evacuation Planning
- Acceptance Testing

## LOSS CONTROL

### Benefits of Working with TVA Loss Control Services

- Our Highly Protected Risk (HPR) staff has an average of eighteen years in loss control and risk management, and were all trained at one of the “big three” insurance companies.
- Many of TVA’s staff are licensed fire protection engineers.
- TVA has staff around the world to reach your facilities.
- TVA is a loss control provider for most of the world-class insurance firms.
- TVA Total Vision™ is our proprietary, Web-based document management service.

Our dedicated team of loss control professionals allows us to tailor our service offerings to suit your needs.

# From Program Design to Impairment Handling, TVA Loss Control Services Have You Covered

## Account Management

TVA engineers can assist you throughout the entire risk management process. Our services range from the development of performance standards, to the analysis of third-party recommendations, to providing cost-effective recommendations, and corrective action. TVA utilizes a proven method to develop loss control programs and protection criteria to suit your needs and corporate philosophy. As needed, TVA engineers perform engineering surveys and prepare underwriting analysis for insurance premium questions, treaty seating, and determination of insurance-to-value. Cost-effective technical engineering solutions can be developed for you that eliminate deficiencies that effect insurability.

## Project Management

A full-service fire-protection engineering firm, TVA provides a comprehensive suite of project design and management services. We start in the early stages of the project in order to incorporate loss control standards for fire protection and construction of the facility, and can conduct site analysis for catastrophe exposures and suitability of water supplies.

**Our services include:** plan review services, new project review and design, construction project management services, criteria development, and on-site inspections of facilities.

## TVA Total Vision™

TVA Total Vision™ is our proprietary, Web-based database that allows customers to manage their information needs.

TVA Total Vision™ has search capabilities that allow you and your customers to access, quickly and securely, reports, diagrams, and other documents related to the locations that have been surveyed.

## Property Loss Control Surveys

The TVA Highly Protected Risk (HPR) department conducts detailed loss prevention surveys to evaluate a facility for property loss control. Insurers, insured clients, and other customers use the information gathered, which guarantees the highest level of protection and underwriting information.
