

Cutting-Edge Technology for Risk Management

Searching for mission-critical information hidden in dozens of databases and thousands of pieces of paper: it's a serious challenge facing risk managers, brokers, loss control, and insurance company professionals.

The consequences of poor data and document management are wasted resources, decreased profits, and diminished worker productivity. And with companies reducing office and storage space and cutting administrative budgets, efficient data and document management is now a business mandate.

We at TVA Fire & Life Safety, Inc. understand the scope of this challenge, so we created TVA Total Vision™ – a proprietary, Web-based document management service that allows you to access reports, diagrams, and other documents related to operations that have been surveyed by TVA, quickly and securely.

TVA Total Vision runs on a standard Internet browser (no additional software is needed), is easy to use, boasts advanced search capabilities and location benchmarking, and allows you to retrieve data 24/7 – so you always have the information you need to make smart risk management decisions. It's also password protected and enables you to set authorization codes, so only the appropriate people see relevant information.

TVA Total Vision has five key features that are vital in the risk management process:

- The All Sites Report: gives a listing of all available site reports and the associated documents.
- The Advanced Site Search: allows an individual to search for site reports based on a wide variety of criteria.
- The Recommendation Summary Report: produces a list of recommendations by site based on selections.
- The Executive Summary Selection: gives a list of site search criteria in order to produce a report that shows the site name, any documents associated with that site, and an executive summary.
- Benchmarking: allows users to compare different aspects of a facility to either another facility or to industry average specifications.

TOTAL VISION™

TVA Total Vision™, putting the facts you need just a mouse click away.

You also can store a wide variety of documentation in TVA Total Vision: survey reports, diagrams, water test reports, recommendations, loss control inspection reports, and facility site diagrams (past and present).

Survey reports generated by TVA Total Vision include: a property description, scope of survey, changes since the previous survey, and recommendations (with comments from managers at that site). TVA Total Vision also includes fire protection water supplies and test results (chart and graph), and a facility report containing descriptions of the following: breakdown of construction at the facility, process flow, plant utilities, special hazards, high-pile storage, fire-protection water supply, automatic sprinkler protection, surveillance, plant emergency organization, management loss prevention programs, and business interruption exposure analysis.

TVA Total Vision allows you to change the status of recommendations, as well as provide comments on recommendations. A diary of all changes to the recommendations is included. You also can print out loss control reports in PDF format – a convenient way to share important information with your associates and partners.

Having instant access to mission-critical risk management information is vital in these unpredictable times. TVA Total Vision ensures that you can take preemptive steps and respond quickly in an emergency by putting the facts you need just a mouse click away.
